

Bridge \leftrightarrow Proxy

can this be detected? **TRANSPARENT PROXIES!**

Configure Bridge

☒ choose a bridge

Any info about bridge?

☐ Enter custom bridges

☐ save as default

should this pop a text field for name?

Proxy settings

☐ Save as default

user must be able to skip writing this out altogether

more prominent button than continue.

☐ Google Chrome

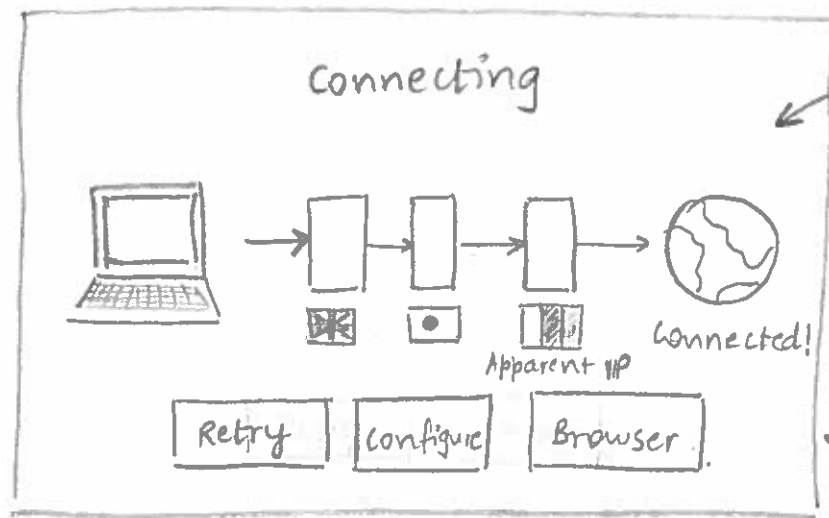

☐ Firefox

what'll happen if user does not enter proxy information if his connection is proxied?

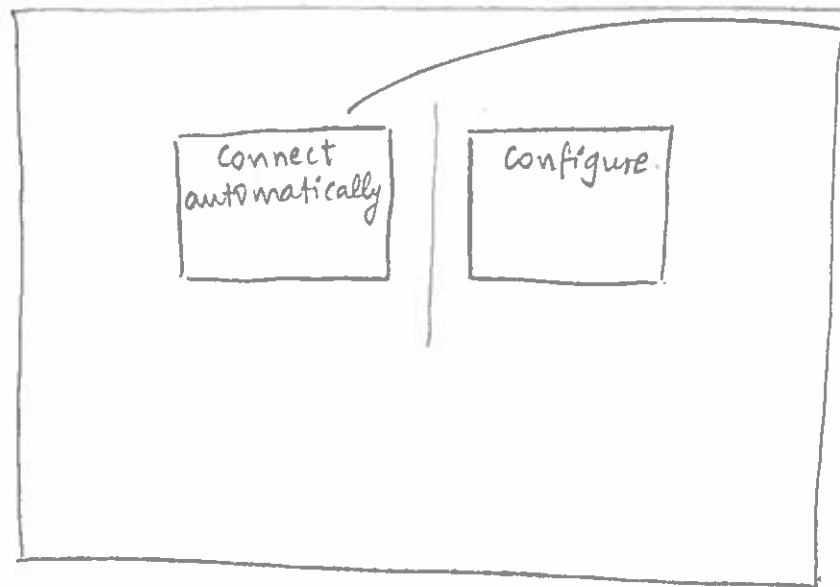

what about transparent proxies?

No proxy configuration found!

- ?
- ☐ I am unsure about my proxy information
 - ☐ Skip proxy information
 - make them aware of what could happen
